

INTELLIGENCE RUNS IN OUR FAMILY

OUR COMPLETE LINE OF **FAST-TRACK®** INTELLIGENT DIAGNOSTICS TOOLS

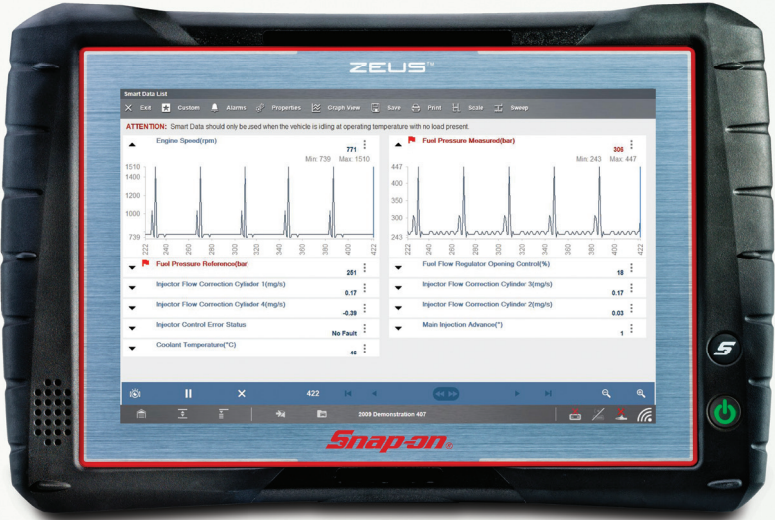

*The industry's most intuitive diagnostic platforms,
driven by the industry's most efficient and effective
communications and experience-based software.
All backed by the industry's most reliable customer
support. That's what makes Snap-on® Fast-Track®
Intelligent Diagnostics tools the smarter choice.*

Since day one, we've been committed to creating tools that enable technicians to work smarter. Whether you're a young tech looking for an entry-level scanner, a garage owner, or anyone in between, no one offers smarter solutions than Snap-on. As you'll see on the following pages, no one offers the range of choices we do, either.

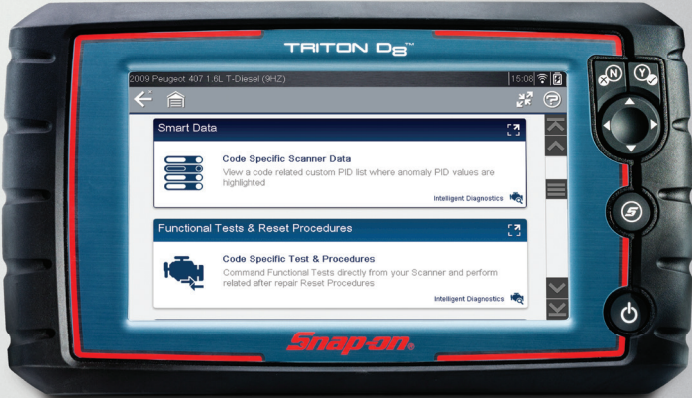

Driven by Fast-Track® Intelligent Diagnostics from Snap-on®

ZEUS™

The intelligent choice for the garage owner, master technician or anyone else who wants the most troubleshooting and repair information possible without wading through unnecessary steps. The ultimate diagnostic tool – and the ultimate timesaver.

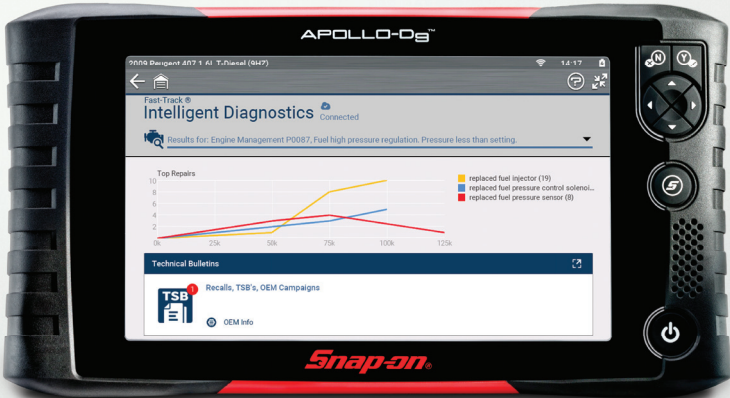

pg 4

TRITON-D8™

The intelligent choice for the garage owner or general technician who's looking to save time troubleshooting and wants the added convenience and advantages of a built-in scope.

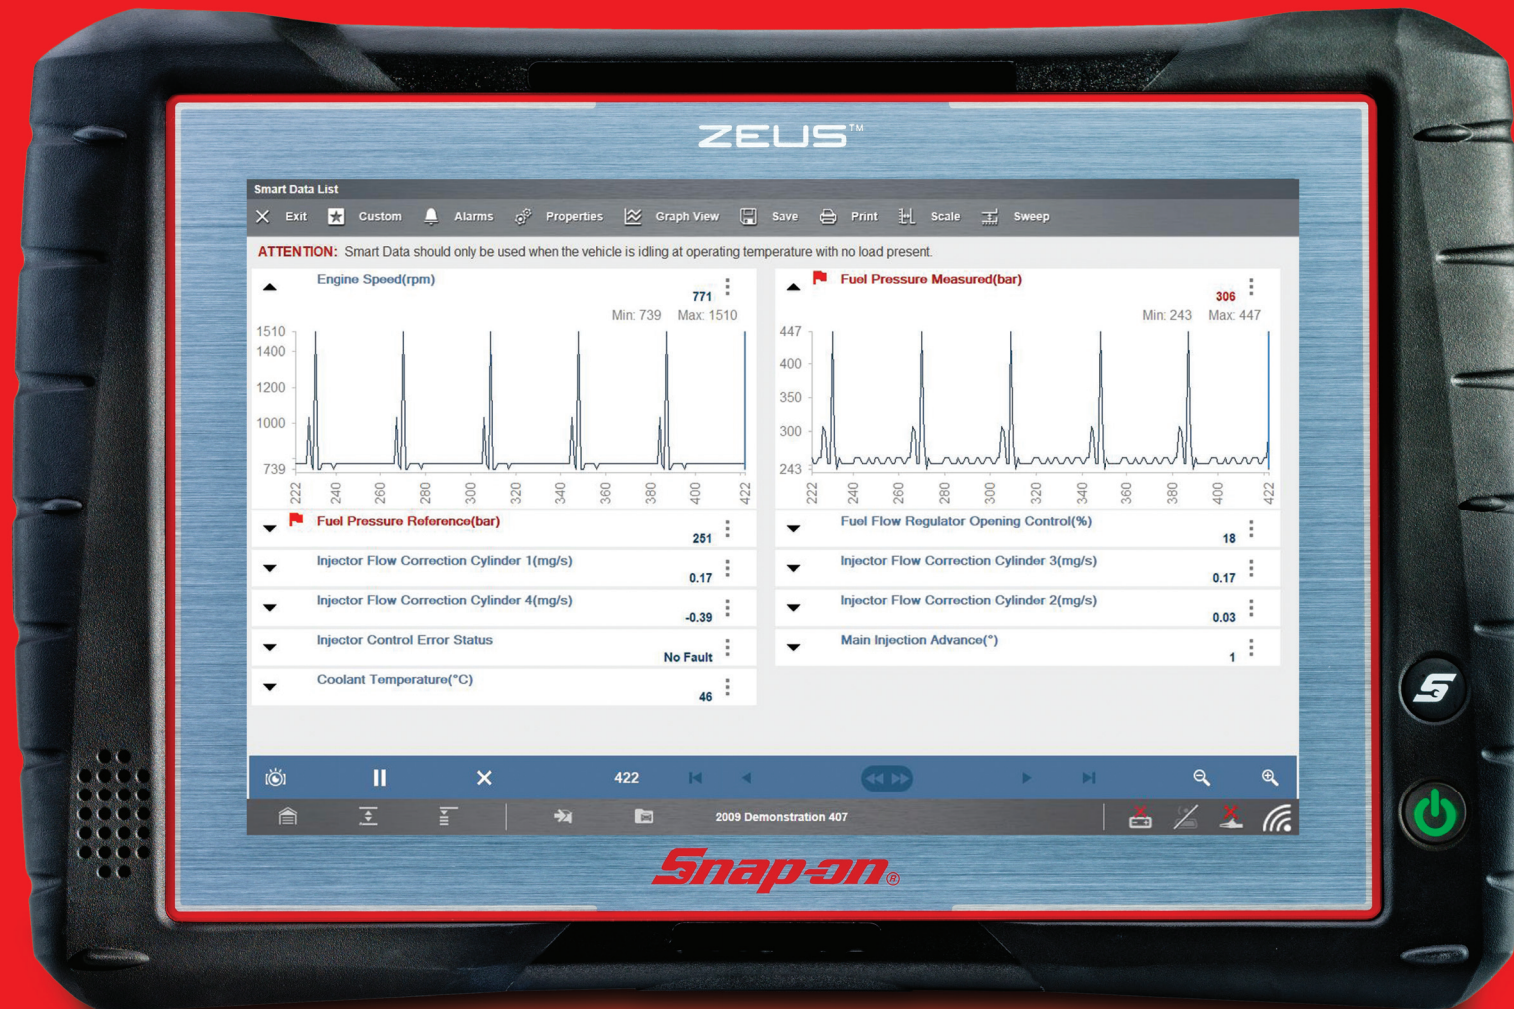

pg 6

APOLLO-D9™

The intelligent choice for the general repair technician who needs a tool that's ideal for getting through the everyday tasks and offers the advantages of filtered code and vehicle-specific data to help find the right fix fast.

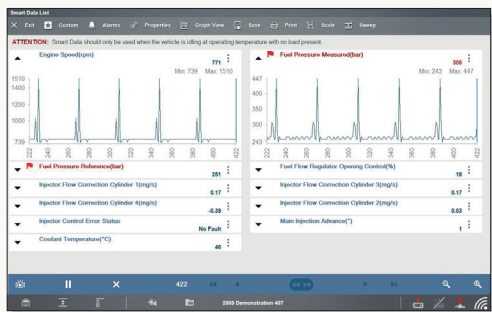

pg 8

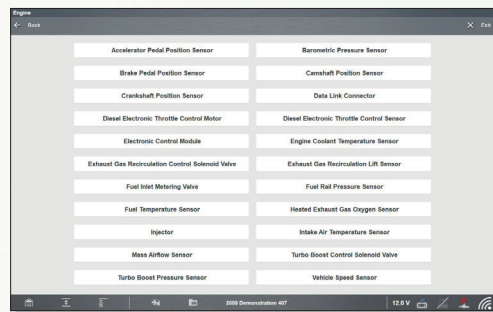

ZEUS™

Get the steps you need, while avoiding the ones you don't.

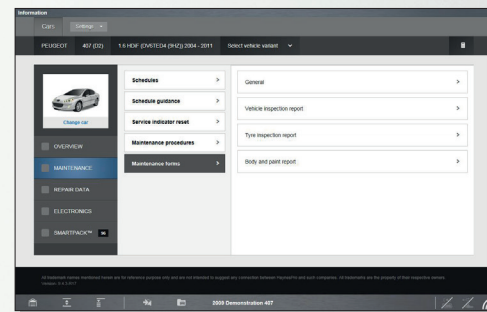

The first tool to feature Snap-on® Fast-Track® Intelligent Diagnostics software, ZEUS provides all the functions and repair tips you need to diagnose, repair and manage any issue. But unlike any tool before, it practically anticipates your next move by guiding you through every step you need to find the solution, while avoiding the steps you don't. It displays only the information that's relevant to the specific vehicle and fault code. From Technical Service Bulletins, Snap-on Information System and scanner Smart Data to the 2019 Queen's Award winning SureTrack® real fixes, ZEUS is the most sophisticated, intuitive tool we've ever created. Accessing all the Intelligent Diagnostics functions requires an applicable software agreement, which more than pays for itself through its depth of information and time savings.

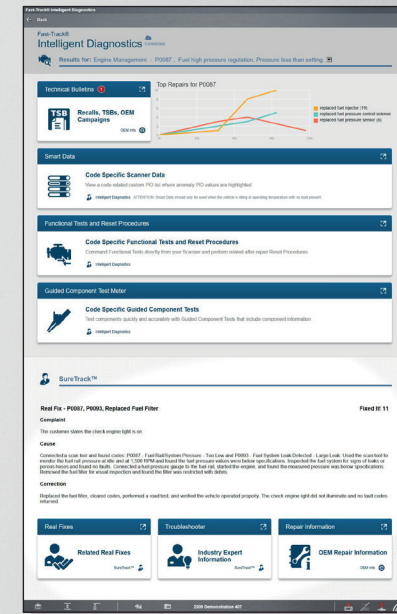

View filtered Parameter ID PID lists and graphs specific to the vehicle and fault code. Flags highlight data that is out of expected range.

Access guided component and functional tests that provide you with clear step by step procedures.

Snap-on Information System gives you critical repair information including wiring diagrams, OEM Technical Service Bulletins, OEM recalls and case studies, service guides and detailed maintenance procedures, repair times and dataprocedures.

Fast-Track[®] Intelligent Diagnostics provides everything you need for that vehicle and that particular code on a single display.

Features

Display Tablet

- Thin and light tablet display, with a 10," 1280x800 high-resolution display for precise detail
- Capacitive touchscreen, sensitive to your every gesture for easy navigation
- Boots from cold in about a minute; powers up from Ready Mode in just 5 seconds
- Extended 5-hour battery life, with days of standby power in Ready Mode
- Built-in Wi-Fi[®] and Internet browser to access your choice of information resources wirelessly
- Bluetooth[®] to stay connected to the vehicle and the internet while moving freely around the service bay
- 64GB solid-state drive and a Quad-core Intel[®] Celeron[®] processor, and factory-installed Microsoft[®] antivirus and security essentials for secure operation

Built-in Software

- Integrated diagnostic suite for fast, easy navigation: scan tool, lab scope, Guided Component Tests, the 2019 Queen's Award winning SureTrack expert information, Technical Service Bulletins TSBs, data manager, Snap-on Information System
- Access to Snap-on Information System maintenance and repair database packed with everything from maintenance intervals, procedures, TPMS, EPB, suspension geometry, wiring diagrams, ADAS and many more.
- Comprehensive data manager that can store thousands of vehicle records, customer data, vehicle ID and diagnostic results
- Vehicle System Report shows all fault codes, readiness monitors in a customer-friendly format. Helps to sell services and communicate with customer
- Resets and relearn procedures to ensure that components register and are operating correctly
- Lightning-fast code scans, with a complete overview of the vehicle and its history for fast triage and workflow organization
- Pre- and post-scan capability for faster approvals, histories, repairs and payments

Scan Module

- Compact Scan Module is cordless, wireless, easy to carry in a pocket, and conveniently out of the way when connected
- One-Touch Full Vehicle Code Scan & Clear quickly checks and clears codes for all available modules on the vehicle
- Original Equipment Manufacturer (OEM) diagnostic functions, tests and coverage previously found only in expensive factory tools

Scope Module

- Modular, dockable lab/ignition scope/meter with 2.7m USB cable for portability and reach
- Exclusive Guided Component Tests show what to test, how to connect and what results to look for. Avoids unnecessary parts replacement

Fast-Track[®] Intelligent Diagnostics Software

- Intuitive start screen featuring a comprehensive view of a logical diagnostic workflow
- Graphical display of the specific parts and procedures most frequently used at a specific mileage to fix the symptom or selected code
- Up-to-date, one-click access to relevant vehicle and code-specific OEM TSBs
- Functional tests and resets to quickly verify component operation, with easy-to-follow procedures to confirm and validate repairs
- "Smart Data," delivering relevant parameter IDs PIDs for the specific vehicle and code - and highlighting those out of expected range
- Firsthand insights from other technicians written specifically for Snap-on
- Ability to switch quickly between functions at any time - without having to go back to the start of the process

TRITON-D8™

Getting to the fix fast means getting to more jobs every day.

Whether you're looking for a tool for yourself or your garage, TRITON-D8 is the ticket. Featuring a built-in scope to help you quickly identify and verify faulty components, it provides all the time-saving features of Intelligent Diagnostics, plus productivity-boosting features like the 2019 Queen's Award winning SureTrack® expert information and access to Original Equipment Manufacturer specific TSBs and Diagnostic Trouble Codes DTCs. All of which means it shouldn't take a genius to figure out how much positive impact it could have on your career — or your bottom line.

Features

Scope Module

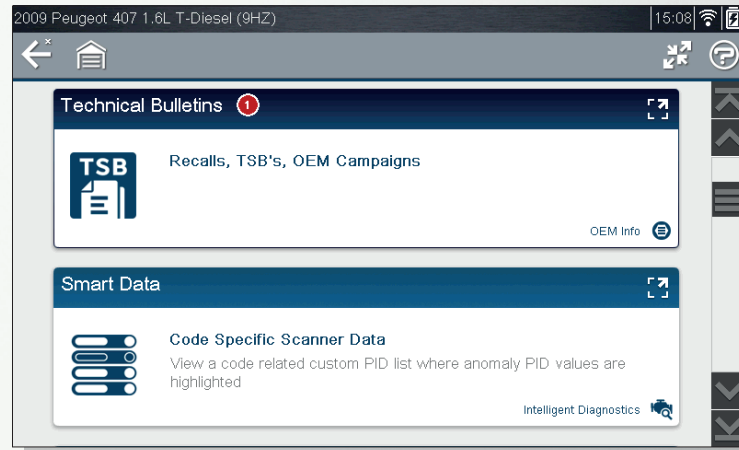

- Guided Component Test Meter pinpoints fault codes at a glance
- High-speed 2-channel lab scope displays live signals for two waveforms in real time
- Six megasamples/second captures high-speed details and faults other scopes miss

Fast, Productive and Simple to Learn

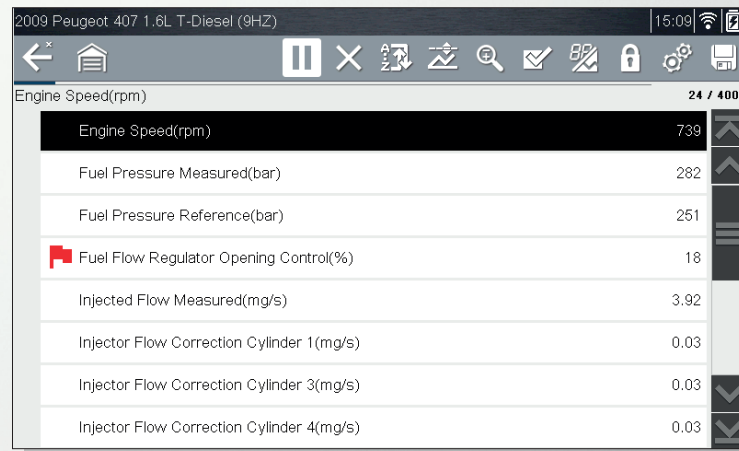

- Fast 5-second boot up and Instant Vehicle ID
- Resets and relearn procedures to ensure that components register and are operating correctly
- Lightning-fast code scans, with a complete overview of the vehicle and its history for fast triage and workflow organization
- Pre- and post-scan capability for faster approvals, histories, repairs and payments
- Verified repair tips and fixes via SureTrack, eliminating the need to consult other resources
- Links to the Snap-on® Cloud via altusdrive.com
- Powerful Peak Detect function grabs glitches, dropouts and ignition spikes
- Scale range 0-100mV to 0-400V
- Sweep rate: 50 microseconds to 20 seconds (5 minutes in graphing meter mode)
- Automatic meter configuration matches the selected test – or customize settings manually
- Test coverage for sensors, solenoids, injectors, charging/starting systems, ignition, motors, pumps, ABS and many more

Fast-Track® Intelligent Diagnostics Software

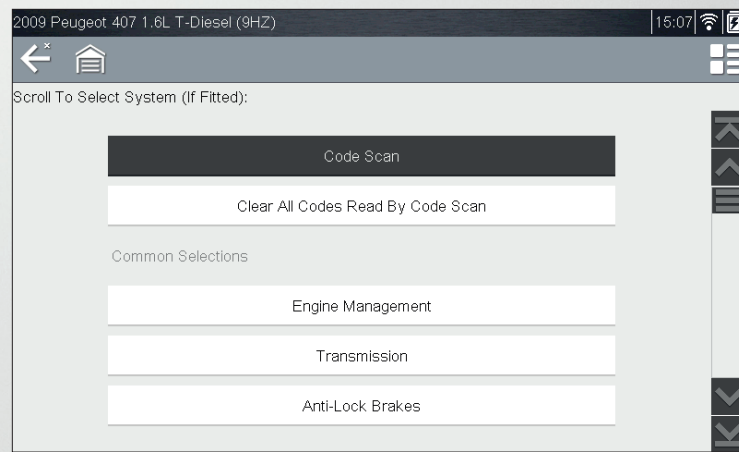

- Intuitive start screen featuring a comprehensive view of a logical diagnostic workflow
- Graphical display of the specific parts and procedures most frequently used at a specific mileage to fix the symptom or selected code
- Up-to-date, one-click access to relevant vehicle and code-specific Original Equipment Manufacturer specific OEM TSBs
- Functional tests and resets to quickly verify component operation, with easy-to-follow procedures to confirm and validate repairs
- “Smart Data,” delivering relevant Parameter IDs PIDs for the specific vehicle and code – and highlighting those out of expected range
- Firsthand insights from other technicians written specifically for Snap-on
- Ability to switch quickly between functions at any time – without having to go back to the start of the process

Relevant technical service bulletins. You'll save a huge chunk of time by accessing OEM TSBs for that code and that vehicle – all right on the tool and reachable within one simple click. Which makes it the ideal place to start your diagnosis.

The smart choice for smart data. With built-in “Smart Data”, TRITON-D8 automatically configures the display to show vehicle parameters (PIDs) relevant to the fault code. It saves you even more time by filtering out non-related data parameters.

Built-in scope lets you verify component failure. Its guided Component Test Meter pinpoints fault codes at a glance, helping you quickly identify the faulty component.

APOLLO-D9™

The super-fast, super-smart, super-easy super tool.

Ideal for the general repair technician, the APOLLO-D9 saves you time by filtering a universe of data and guiding you directly to the answers you need – so you can find the right fix every time. Bringing greater focus to every repair and greater efficiency to you and the garage. With features and advantages – including Fast-Track® Intelligent Diagnostics software – you'd otherwise expect only from a more advanced diagnostic platform.

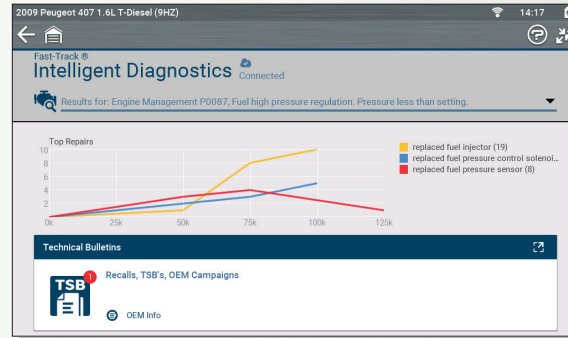

Features

Fast, Productive and Simple to Learn

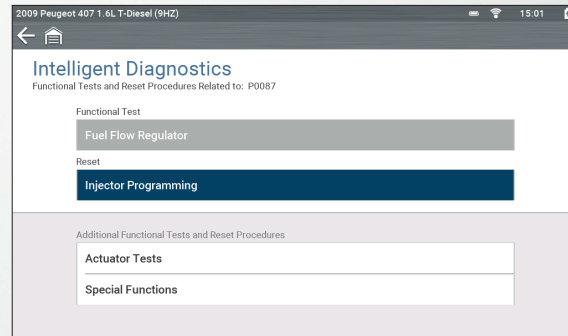

- Super-fast boot up: ready to use in just seconds
- Large 9" display for better readability and greater ease of use
- Detailed trouble code definitions, live data, functional tests, relearns and adaptations
- Customizable to work the way you do – custom data lists, freeze-frame, parameter ID PID sorting, pause, zoom, PID trigger, snapshot and cursor functions
- USB port for PC connectivity; save, print and share using ShopStream Connect™ software
- Unique, steady-charge lithium-ion battery system charges automatically from the vehicle
- One-Touch Code Scan & Clear All Code performs a complete scan of all available vehicle systems
- Original Equipment Manufacturer-specific coverage for more than 100 vehicle systems and nearly 40 manufacturers
- Verified repair tips and fixes via the 2019 Queen's Award winning SureTrack, eliminating the need to consult other resources
- Built-in demo guiding you through operation and main features
- Resets and relearn procedures to ensure that components register and are operating correctly
- Lightning-fast code scans, with a complete overview of the vehicle and its history for fast triage and workflow organization
- Pre- and post-scan capability for faster approvals, histories, repairs and payments

Fast-Track® Intelligent Diagnostics Software

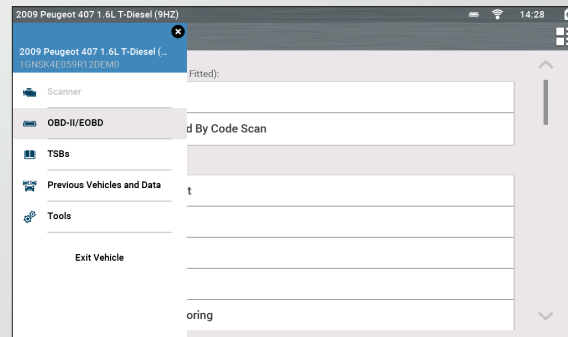

- Intuitive start screen featuring a comprehensive view of a logical diagnostic workflow
- Graphical display of the specific parts and procedures most frequently used at a specific mileage to fix the symptom or selected code
- Up-to-date, one-click access to relevant vehicle and code-specific Original Equipment Manufacturer specific Technical Service Bulletins
- Functional tests and resets to quickly verify component operation, with easy-to-follow procedures to confirm and validate repairs
- "Smart Data," delivering relevant PIDS for the specific vehicle and code – and highlighting those out of expected range
- Firsthand insights from other technicians written specifically for Snap-on
- Ability to switch quickly between functions at any time – without having to go back to the start of the process

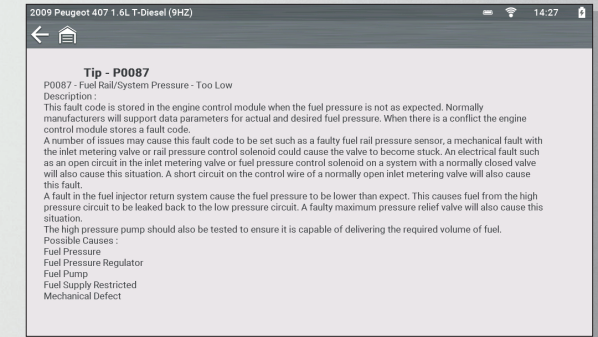

Technical Service Bulletins give you up-to-date, one-click access to relevant vehicle and code-specific OEM Technical Service Bulletins TSBs

Smart Data shows you relevant PIDs for the specific vehicle and code, highlighting those out of expected range.

Top Repairs provides a graphical display of the specific parts and procedures most frequently used at a specific mileage to fix the symptom or selected code.

Functional Tests offers access to a pre-filtered list of functional tests and resets, letting you quickly verify component operation – with easy-to-follow procedures to confirm and validate your specific repair

Quick Access Menu gives you the ability to switch quickly between functions at any time – without having to go back to the start of the process.

SOFTWARE + SUPPORT

How to make your diagnostic tool even smarter.

Software Subscription

Our Subscription programme allows you to maximise your earning potential, ensuring your tool maintains the same performance as it did on Day One, whilst saving up to 30% on the software costs. Regularly scheduled software upgrades - and the ability to self-download these – coupled with full access to the Fast-Track® Intelligent Diagnostics features ensure that your diagnostic tool continuously provides you with our most advanced, up-to-date data & information. Also, as an Intelligent Diagnostics subscriber, you'll qualify for an exclusive 'Loyalty Discount' on our Snap-on Information System product too. Just ask your Snap-on Franchisee or Sales Rep for more information.

Online Training Live

Join our Snap-on Diagnostics Experts live to learn how to get the most functionality out of your diagnostic tool, and receive a Professional Development Certificate from the Institute of Motor Industry after completing the course. Register for free online training at: diagnostics.snapon.co.uk/online-training

Training Solutions®

Online training and support available 24/7 at: diagnostics.snapon.com/trainingsolutions

The Snap-on Cloud

When using the most current software and connected to Wi-Fi, your ZEUS, TRITON-Dg and APOLLO-Dg can automatically upload vehicle system reports and screen captures to the new Snap-on Cloud, so you can access them from your phone or computer whenever you or your customer needs them. With the Snap-on Cloud, make your next diagnosis – and your next repair – quicker than ever before.

Go to altusdrive.com to get connected.

Accessories

We offer hundreds of smart ways to personalise, protect and expand your diagnostic investment. Just ask your Snap-on Franchisee or other Sales Representative for details. Or visit: diagnostics.snapon.co.uk

Diagnostic Tools Quick Reference Guide
